BYU MARRIOTT SCHOOL OF BUSINESS

Welcome to the AI Foundry

AI Foundry Lab · MBA 693R-011 / STRAT 490R-001

Congratulations. You have been selected to join the AI Foundry.

The AI Foundry is an experiential learning program where students do real work for real organizations. The course is designed to give students an experience similar to working for a top-tier consulting firm.

By signing below, you accept admission into the AI Foundry and agree to the following.

WHAT YOU COMMIT TO

1. **The BYU Honor Code.** I will strive in all respects to live the BYU Honor Code, including the Dress and Grooming Standards (notify the program faculty advisor proactively if you hold a current beard card)
   Church Educational System Honor Code: https://policy.byu.edu/view/church-educational-system-honor-code
   Dress and Grooming Principles and Expectations: https://policy.byu.edu/view/church-educational-system-dress-and-grooming-principles-and-expectations
2. **The Constitution and Operating Principles.** I have read the AI Foundry Constitution and Operating Model and will strive to hold myself and my teammates to its principles.
   Constitution and Operating Model: https://byu-strategy.github.io/ai-foundry/students/00-constitution.html
3. **The Client Service Selection Policy.** I have read the policy governing what types of engagements are in-scope for the AI Foundry and will discuss any fit concerns I have with the faculty advisor.
   Client Service Selection Policy: https://byu-strategy.github.io/ai-foundry/students/00-client-selection.html
4. **The trust of the people we build for.** I will protect their confidentiality, meet the commitments my team makes, and raise problems early rather than late.
5. **My teammates.** I will give and receive direct feedback, do my share of the work, and take equal accountability for the team's results.

ENROLLMENT

Register for the section that matches your program. Both sections meet together.

PROGRAM	COURSE	SECTION	CREDITS
MBA	MBA 693R	011	3.0
Undergraduate	STRAT 490R	001	3.0

Class meets Fridays, 8:00 to 11:50 AM, 1244 TNRB.

WHAT YOU WILL WORK ON

Foundry work takes three forms.

Funded engagements. A client pays a fee, retains the intellectual property, and expects professional delivery. These carry the tightest obligations.

Claude certification. Everyone works toward the Claude Certified Developer credential, which is what qualifies the Foundry for the Claude Partner Network. The preparation is coursework and the Foundry reimburses the exam fee (repeat attempts are a personal expense).

AI Foundry projects. Everything the Foundry builds on its own account: internal tools, thought leadership and open repositories, and unfunded engagements for outside organizations such as nonprofits, university units, and early-stage ventures. The standard of work is identical to a funded engagement. Where an outside organization is involved, its confidentiality and intellectual property terms apply in full.

TIME EXPECTATION

This is a 3.0 credit hour course and the expectation is **10 hours per week**.

Work beyond 10 hours a week is expected when staffed to a paid client engagement.

REMUNERATION

Conditional on collection of paying client fees, students will be reimbursed via their BYU student financial account for AI tooling usage up to agreed project limits. The timing of this reimbursement depends on client fee collection and will be done promptly after fee collection. If there is sufficient AI Foundry revenue, students may also receive an additional stipend posted to their student accounts.

CONFIDENTIALITY, INTELLECTUAL PROPERTY, AND PUBLICITY

Ownership is set by the agreement governing each piece of work, and it is not the same for every kind of Foundry project.

- **On a funded client engagement, deliverables and intellectual property belong to the client.** They do not belong to me and they do not belong to BYU.
- **On an AI Foundry project, ownership depends on what the project is.** A Foundry tool or Foundry repository belongs to the Foundry. An unfunded outside engagement is governed by that engagement's agreement.
- At the request of a client or partner, I will sign **Nondisclosure Agreements** covering the work I do on that engagement.
- **Check individual agreements for what can be shared publicly.** In many cases, the details of our work may need to remain confidential by client request.

ACKNOWLEDGMENT

I have read this letter, the AI Foundry Constitution and Operating Principles, and the Client Service Selection Policy. I agree to live the BYU Honor Code and the Dress and Grooming Standards, and to represent the AI Foundry and BYU accordingly.

I understand and accept the confidentiality, intellectual property, and publicity obligations set out above.
